Overview

A modern, sustainable static welfare cabin designed for use at construction sites, events, festivals, film sets, and more. Suitable for accommodating up to 20 people. Built with sustainability in mind to reduce carbon emissions, fuel consumption, and noise pollution, and complies with all HSE requirements for construction and hire industries.

Facilities & Amenities

- Spacious canteen with seating and built-in refrigerator
- Separate office area
- Drying room with hanging facility
- Recirculating toilet and warm water wash facilities
- Easy-to-use controls and USB charging points
- Tough, wipe-clean interior & exterior surfaces

Safety & Security

- Dual heavy-duty locking system on each door
- Carbon monoxide detectors installed

Sustainability & Energy Efficiency

- Minimal noise and low fuel consumption
- LED lighting operable without generator
- Auto generator stop/start technology
- Timer-controlled heating and on-demand hot water
- Net Zero options: hydrogen/solar power with HVO generator backup

Compliance & Strength

Built to meet HSE welfare standards and robust enough for the rental and hire industry.

Structure

Robust steel construction with galvanized, impact-resistant exterior.

Insulation

Fully insulated walls and roof with no cold bridging for better thermal efficiency.

Dimensions & Capacity

Length	7315 mm
Width	2744 mm
Height	2490 mm
Capacity	Up to 20 people (13 with office / 20 without office)
